The ride is about 2-3 minutes long. The visuals are mediocre. However, the ride itself is actually nice. It has twists and turns, and loop de loops. The background image of a starry space is very poorly done. The images in the foreground are much better, but still just average. The game ran smoothly, but I did notice lots of blurry images when the ride went fast. The rollercoaster itself is a spaceship, that I guess you're sitting on top of which seemed weird to me. It would have been great if instead you had a cockpit view.

If you love VR rollercoasters, then this is a nice buy for .99 cents on sale. I'm only recommending this game for VR rollercoaster fans. This is better than the average VR rollercoaster.

Rating 6/10 (compared to other VR rollercoasters)
